# The EPSON SR-600 makes sure of perfect hospitality

With the SR-600, EPSON has added yet another highlight to its range of POS terminals. The new touch-screen terminal was specially developed for the hospitality industry as well as for specialist retailers. Its high level of functionality, open architecture and extremely attractive design all make the SR-600 the ideal host.

As we all know, in restaurants, bars and cafés the customer is always treated like royalty– sensitive POS hardware, on the other hand, is faced with somewhat inhospitable conditions in this field. For high-tech equipment, cake crumbs, coffee, beer or grease splashes can be like sand in the works. Now that's all a thing of the past! Damp or greasy hands are no longer a problem, either. The new SR-600 touch-screen terminal from EPSON is resistant to splashes of fat and water and really easy to clean as the housing is smooth and has no "dirt traps". This makes the SR-600 the ideal solution for all restaurants, bars and fast-food chains.

Elegant and powerful. The EPSON SR.

Flexibility and state-of-the-art technology

The open architecture of the SR-600 enables the user to tailor his POS solution to his individual needs. POS printer, customer display and magnetic strip reader are just some of the extra options available for the SR-600.

There are no limits to the various combinations possible. The USB-peripheral equipment can be hooked up quite simply without any problem according to the plug&play principle. Concealed cable connections literally make unsightly jumbles of cable or the accidental pulling-out of plugs a thing of the past. A clear, tidy impression is guaranteed. Yet that is by no means all the SR-600 has to offer. Behind its lockable front panel, it conceals all the technical prerequisites for the following components to be installed: CD-ROM drive, hard disc or CompactFlash™ board. The hinged main unit, comprising monitor and computer, enables fast, simple access to the main board and hard disc. The high-speed Intel processor and large memory capacity ensure speedy transfer of data and spare customers unnecessary waiting time. An intelligent power-management system reduces energy consumption to a minimum and lowers costs. On top of all this, the SR-600 is compatible with the very latest software applications and thus represents the perfect platform for superior POS applications. Existing applications based on DOS are naturally also compatible.

All security sensible parts are placed behind the lockable cover

Simple to operate and an amazing good-looker

Apart from its great functionality, the SR-600 is also a "delicious morsel" to look at. Thanks to its flat design and minimal use of space, the elegant, anthracite-coloured SR-600 looks really small on top of the counter and thus poses no obstacle to communication with customers. It is space-saving but loses nothing in terms of user convenience. The 12.1" LCD monitor with touch panel functions guarantees the user uncomplicated and convenient operation– because clarity and a simple menu mode are something you can expect from the SR-600. The operating panels for the respective line of business can be programmed on the user interface. In addi-

tion, it is possible to render photos or symbols so as to make operation even easier. This is particularly useful where staff changes frequently arise. All POS functions are quick and easy to perform– even for "non-chefs de cuisine" in matters of cash register operation. Costly staff training sessions and lengthy training times become superfluous. Thanks to the brilliant resolution of 800x600 pixels with 260,000 colours, everything appears on the monitor in needle-sharp quality. The device also includes a 2 x 20 character customer display, which eliminates the need for additional space, and minimises the footprint of the unit.

The diverse range of functions and optional extras make it possible to tailor the SR-600 to the individual needs of any user. The elegant cash register terminal meets all the requirements of hotels, restaurants and specialist retailers. So, for all those who attach great importance to state-of-the-art, high-performance technology coupled with clever design, the new EPSON SR-600 is exactly the right choice– after all, a smart appearance makes all the difference.

On-site service into the bargain

For an entire year, on-site service is included in the purchase price of the SR-600 as well as the other cash register systems IR-320 and MR-800. Qualified technicians replace, wherever possible, any defective components right where the cash register is installed, thus ensuring quick resumption of smooth operation at the check-out and keeping turnover losses to a minimum. For those wishing longer-lasting dependability, there is also the option of extending the on-site service to three or more years.

Meanwhile, there are a large number of software programmes, which have been designed for use with the IR and cover all important business needs from general merchandising solutions to branch related applications.
You can find the complete solution, which is most suitable for your business sector in the „EPSON Solution partner" table. Under "Application Reports" you can find some references of successful users of the EPSON POS-systems.

Features of SR-600

Your benefit

Compact Design on small footprint	Minimal footprint (30,3 x 30,6 cm) saves space on the counter, no cableknots, all-in-one
Elegant and smooth housing	Good looking in high class environment, resistant against dirt and water, easy to clean
Modular structure	The SR can be individually customised, all components are specially built to work with each other
Programmable user-interface for touch-panel LCD	Colour coding and large on-screen buttons minimise learning-curves and maximise ease-of-use, Photos and symbols can be shown as well, especially useful for often changing personnel
Adjustable LCD, keyboard and customer display	Optimised ergonomy for the standing, as well as the sitting user
Easy handling by finger touch	Quicker introduction of personnel
12,1" TFT display	Brilliant display of graphics, text a. photos, sensible and easy to touch
Easy assembly with few screws	Reduced service- and maintenance costs, quick and easy adaptation of the system (network connection etc.)
Integrated Ethernet card	Easy to connect to networks, Wake-on-LAN-function allows to boot the system by network
Base unit with an Intel Celeron CPU	High CPU performance for new applications like network-, training- and multimedia applications
Intelligent power management	Reduces power consumption and saves money
PC/AT compatible BIOS, PCI-slot	Open standard architecture saves your investment, easy upgrade with ISDN or other PCI cards
2 internal slots for HDD, CD-ROM or CompactFlash drive	Perfect for security back-up, updates and exchange of data
Integrated customer display	No additional cabling, minimises footprint of the system
Integrated 3-track MSR (option)	Best ergonomic position, easy to use e.g. for EC cards
Lockable drive cover	High security level to prevent data loss and unauthorised use of the system, no access to confidential data
Integrated power supply	Just one cable for the complete system needed
Hidden cable connectors	Prevents the cables to be pulled out by accident
14 interface for POS-peripherals	Flexibility, upgradeability, the newest technical standards are supported, open architecture
Programming tools free of charge	Saves time and money for application development
Supports EPSON thermal-, impact-, SEA-Jet®- or hybrid printers	Easy to use and reliable printers save time at the POS and reduce training costs
1 year On-site-service included, 3-year On-site-service as option	Ensures ongoing business at the POS in case of defect
An EPSON product	The performance of a strong partner, wide experience and support, compatibility to all EPSON POS-printers

Technical Data of SR-600

CPU	Intel Celeron® 733 MHz
Memory	2 x 168 pin DIMMs (max. 512 MB)
Drives	• FDD external (option) • 1 HDD 2,5" (option) • CD-ROM internal (option) • CompactFlash card (instead of HDD or CD-ROM)
Extensions	1 x PCI
Interfaces	3 serial free, 2 of them with +5V 1 PS/2 (Y-adapter) 2 for 1 cashdrawer each 1 parallel 2 USB 1 for customer display 1 for external FDD 1 Ethernet 10Base-T/100 Base-TX 1 for ext. CRT/LCD 1 power in
Video	2 MB Video-SDRAM on board
Standard features	• Power switch soft on front • Main switch on back side • Built in power supply 100-240 V • Integrated buzzer, adjustable • Lockable cover for storage drives • Wake on LAN
OS	DOS, Windows98/2000/NT/XP, Linux
Dimensions WxDxH mm	Base unit: 303 x 306 x 113 (without LCD and customer display)
Weight	ca. 6,1 Kg
Colour	EPSON cool white or dark grey
Colour TFT with touch-panel	12,1" (30,7 cm) TFT (800 x 600, 262k colours)
Options	• 3-track MSR ISO • CD-ROM integrated • CompactFlash instead of CD-drive • CompactFlash instead of HDD • Drawer-board • External FDD • External DM-D customer display • Pole extension for DM-D • External EPSON TM-printer • 3 years On-site-service
Included Accessories	• User manual • DM-D adapter • Keys for drive cover • 1 year On-site-service
